Wicklow	95	79	146	279	177

Note: The figures quoted include data from all publicly funded hospitals which were included on the Hospital In-patient Enquiry (HIPE) system during 2020.

In-patient and day case discharges are reported only; ED and Out-patient attendances are not recorded on HIPE. Patients of No Fixed Abode or not normally resident in Ireland have been excluded.

It is important to note that this data is based on hospital discharges only and does not include patients undergoing treatment who are not admitted to hospital.

Furthermore, the data is based on hospitalisations which may include multiple admissions for the same patient. Therefore the data presented here cannot be construed as an estimate of the prevalence of the treatment specified.

For every discharge HIPE captures a principal diagnosis and up to 29 additional diagnoses, and up to 20 procedures, in addition to administrative and demographic information.

Diagnosis and Procedures are coded using ICD-10-AM/ACHI/ACS (from 2015-2019 8th edition was used, from 2020 10th edition is used).

ICD-10-AM is the International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Australian Modification.

The ICD-10-AM disease component is based on the World Health Organisation (WHO) ICD-10. ICD-10-AM is used in conjunction with the Australian Classification of Health Interventions (ACHI), and the Australian Coding Standards (ACS) to reflect an accurate health episode of care.

The Healthcare Pricing Office does not report cells where the number of discharges reported to HIPE is between 1 and 5. In this output, such cells have been presented as ~.

Discharges from Non-Group hospitals were excluded, except for NRH Dun Laoghaire which are part of acute hospitals since 2021 and so have been included for this request.

Please note that the 2020 HIPE data provided does not include any public activity performed in private hospitals under the 2020 private hospital agreements.
