

DO YOU HAVE DIABETES?

PEOPLE LIVING WITH DIABETES SHOULD
HAVE THEIR FEET CHECKED BY A
PODIATRIST AT LEAST ONCE A YEAR.

Book your Podiatry appointment today.

WHY?

A person living with
diabetes is

22

Regular assessments will identify
problems and allow treatment early
thus preventing more serious foot
problems occurring.

times more likely to undergo a
non-traumatic lower limb
amputation

WHAT DO YOU NEED TO DO?

You need to book an appointment for a full
Diabetic Foot Assessment with a podiatrist.

**A DIABETIC ASSESSMENT WITH A PODIATRIST
SHOULD CONSIST OF...**

General and Dermatological assessment

Identifying any underlying issues.

Examine skin for dryness, cracking, calluses, blisters, and ulcers.

Examine toes for cracks and fungal infection.

Check for nails for ingrown or thickening & fungal infection.

Neurologic assessments

Check for numbness and signs of
nerve damage known as neuropathy

Vascular and Musculoskeletal assessment

Check your blood flow and circulation.

Examine the shape and structure of foot for bone
abnormalities in the feet and toes

Footcare Plan and Treatment Option

Design an appropriate plan and treatment option based on your personal
needs.

Provide advice on:

- your “at home” care plan
- nail cutting techniques
- footwear
- the importance of good diabetes management: regular check of blood
glucose levels, balanced diet, exercise.
